

Skin Disease Classification

Model Comparison Report

Model	Accuracy	Loss
Baseline CNN	0.48	1.34
Deep CNN	0.65	1.91
CNN + BatchNorm	0.50	1.70
CNN + Dropout	0.46	1.35
MobileNetV2	0.61	0.96
EfficientNetB0	0.67	0.74
ResNet50	0.66	1.21
DenseNet121	0.58	1.07

Observation

EfficientNetB0 achieved the highest validation accuracy (67%) with the lowest validation loss (0.74), making it the best-performing architecture among all evaluated models. Therefore, EfficientNetB0 was selected as the final model for skin disease diagnosis and Explainable AI analysis.
